737 Jetliner Yoke

Precision Flight Control’s New 737 Style Yoke

Now there are two companies that make this famous style yoke, Boeing and Precision Flight Controls, Inc. We have painstakingly re-produced this stylish yoke for your flight simulation enjoyment. The yoke is cast aluminum with a beautiful powder coated black finish. The yoke comes with dual trim rockers switches that faithfully replicate the look and feel of its real live counterpart and four more yoke mounted programmable pushbutton switches. The yoke is plug and play USB and is compatible with Flight Simulator and X-Plane software. The yoke is also available in columns style or desktop style with pilot or co-pilot configurations.

Features:
The console is equipped with the following switches and features:
- Cast Aluminum Yoke with Beautiful Powder Coated Finish
- Dual Trim Rocker Switches
- Four Additional Programmable Pushbutton Switches

Compatible With:
- Flight Simulator 2004
- Flight Simulator X
- X-Plane

Connectivity:
- USB
- Serial

Available in both Column and Desktop applications.
