Rudder Pedals

High Quality Rudder Pedals Manufactured Only by Precision Flight Controls!

Feel the difference from those plastic sets of rudder pedals. The Cirrus rudder pedals work with all PFC products and is custom designed to work with our Jetliner Column Yoke. It has a powder coated solid aluminum base with a reinforced steel tiller bar design. Each rudder pedal is equipped with a potentiometer for toe brakes. We provide velcro strips to secure the pedals to the floor or carpet.

Note: Because of the offset location of the pedals you may want to secure the pedals to your floor by either velcro or some other securing method.

NOW AVAILABLE! Cirrus pedals designed for the JETLINER

Now get the look and feel of a commercial Jet. The first thing you’ll notice about the Cirrus Jetliner Rudder Pedal Set is high quality and realistic design. These pedals feature a powder coated solid steel skid base with high impact steel pedals which are mounted to a solid steel tiller bar design that move the pedals forward and aft just like a real airplane. The tiller bar is then mounted to aluminum roll pins which is recessed in a oil-lite bushings. Each rudder pedal is equipped with a potentiometer for toe brakes. We provide velcro strips to secure the pedals to the floor or carpet.
